INTRODUCTORY.

WE take pleasure in presenting herewith descriptions and prices of the "Greenville" Strawberry and the "Eldorado" Blackberry tested here at their place of origin for over ten years with marked success, and showing a record at the numerous Government Experiment Stations in the United States and Canada, where they have been tested for several years, that cannot be approached by any other fruit of their class.

Thanking my former patrons for past favors, I trust by fair dealing, reasonable prices, etc., to merit the continuance of same. I shall endeavor to represent the facts about fruits, without overdrawn or exaggerating. Believing this conservative course best for my patrons, I submit the following

NEW FRUITS OF SPECIAL MERIT.

The "Greenville" Strawberry.

— DESCRIPTION. —

Berries of large size, good quality, medium texture, very productive, season medium to late, color very even and fine, flowers pistillate, plants very vigorous and free from rust.

This valuable berry, which originated on my grounds and was introduced last year, has the past trying season fully maintained its former good record, as will be seen by the following reports from parties entirely disinterested, and what they say can be relied upon. I have room for but a few of the numerous testimonials on hand.

— TESTIMONIALS. —

Taken as a whole, it was one of the very best among some 150 varieties fruited at the Missouri Agricultural Experiment Station this Season.—JOHN W. CLARK, Horticulturist.

Have nothing to take back of what we have said in former reports regarding Greenville. It is a first-class market berry, and is good enough for home use. The plants are healthy and productive; the berries of fair size and attractive. I rank Greenville as among the best.—W. J. Green, Horticulturist Ohio Agricultural Experiment Station, Columbus, O., Aug. 3, '92.

E. M. Buechly, Greenville, O., Dear Sir.—Our pickers were delighted over the "Greenville," and on our record sheets it stands above all other varieties in yield. In matted row it gave nearly twice the yield of Crescent, and is 25% better than the second on the list. I can only repeat the good report formerly made upon the flavor and quality of the berry, and in my experience of three years with it, I make no exception in recommending it as the best strawberry for either the market or home garden.—GEO. C. BUTZ, Horticulturist Pennsylvania Agricultural Experiment Station, State College, Penn., July 8, 1893.

Also highly recommended by the following Government Experiment Stations:

Tennessee, South Carolina, California, Oregon, Wisconsin, Michigan, Illinois, Indiana, Kansas, Minnesota, Iowa, New York, and in private tests in many other States.

Per Hundred by Express.....\$ 2 00

Per Thousand by Express.....\$15 00

If desired by mail, add 20 cents per 100.

The Greenville
(Downing's Winter Maiden Blush.)

HISTORY.—This fine apple was produced from seed of the Fall Maiden Blush by Jason Downing, in Darke County, O., in the Spring of 1874. It made a vigorous growth, and at the age of 7 years it bore some excellent fruit, from which time it has produced fruit annually. The originator states that in 1888 at the age of 14 years from seed, it yielded 15 bushels of picked apples. We have been noticing the behavior of this apple for the past 10 years, growing it both in nursery and orchard, and from the weight of testimony in its favor, we have decided to grow it in quantities to supply the increased demand.

I have planted extensively of this apple, and others in the neighborhood of its origin are doing the same, and am also planting large commercial orchards of it in southern Missouri. This shows that the apple where known, is appreciated.

DESCRIPTION.—Fruit large, irregular, sometimes flattened, and at other times slightly elongated, inclining to conic; generally angular, skin light waxy yellow, with a bright red cheek in the sun; stock short, usually projecting half as high as cavity, though in a few specimens it projects to its surface and beyond, inserted in a deep cavity, often surrounded with russet; calyx small, basin of moderate depth, flesh yellowish, crisp, tender, juicy, with a very pleasant, mild, sub-acid flavor. It has a fragrant odor; quality very good. Season, December to April. Tree a good grower and bearer.

Almost an Exact

GREENCASTLE, IND., Dec. 15, 1888.—The first object

Copy of Its Parent. which attracted my attention on entering the exhibition room of the Ohio State Horticultural Society, at Troy, was a splendid dish, as I supposed, of cold storage Maiden Blush apples, with all the beauty of that elegant Autumn variety in the prime of its season. This delusion I labored under until a critical examination revealed my mistake. Since my return home I have applied a still more critical test of the qualities of this apple and find it to be the almost identical counterpart, except in maturity, of its parent, the ever popular Maiden Blush.—W. H. RAGAN, Secretary of A. H. S.

Good Quality, We have seen Jason Downing's new seedling apple, and
Fine Appearance. can state that it is of good quality and fine appearance
 somewhat resembling Fall Maiden Blush, of which it is a seedling. It is, however,
 a Winter apple, and has good keeping qualities.—W. N. KINSEY, of Kinsey & Co's
 Nurseries.

At Least as Good as its Parent. R. J. Black, the noted Horticulturist, of Bremen, O., says:
 It is at least as good as its parent, beautiful, good size, good
 flavor and possessing a very fine perfume.

A Most Beautiful Fruit and Suits my Taste Exactly. Samuel Miller, a noted fruit grower of Bluffton,
 Mo., writes: Your letter received, and the box
 with the apples in excellent trim. Have eaten one and we all pronounce it excel-
 lent. It is a most beautiful fruit, and suits my taste exactly.

TADMOR, O., Dec. 19, 1888.—I have sampled the Winter Maiden Blush Apple
 handed me by you, and find it of magnificent form and appearance, greatly resem-
 bling the Autumn Maiden Blush, smooth and nice and of fine flavor. If the tree
 is hardy, certainly an important addition to our fruits.—N. H. ALBAUGH, President
 Albaugh Nursery Co.

Geo. W. Campbell, President Ohio State Horticultural Society, says:—I think
 the apple a handsome, pleasant flavored and good one.

N. Ohmer, Dayton, O., says:—It is a very good apple.

Wm. Gaines, of Hoover & Gaines, Dayton, O.:—Think Downing's Winter Maid-
 en Blush a very promising apple.

J. G. Bilderback, Millersburgh, O., says of it:—A very good apple, worthy of
 cultivation, undoubtedly.

W. J. Green, Horticulturist of Ohio Agricultural Experiment Station, says
 under date of Dec. 13, 1888, Troy, Ohio:—I have just eaten of the Winter Maiden
 Blush and find the quality excellent.

Waterville, O., Jan. 10, 1889.—E. M. Buechly, Greenville, O.:—I ate the sam-
 ple of Winter Maiden Blush you gave me and found it of very good quality, with
 a somewhat tougher skin than the common Maiden Blush, which will make it a
 better shipper. If the tree is all right it will be a valuable variety.—W. W. FARNS-
 WORTH, Secretary Ohio State Horticultural Society.

PRICE.—50 cents each, 5 for \$2.00.

The ❀ "Eldorado" ❀ Blackberry.

History and Description. This berry, like many of our most popular fruits,
 originated as an accidental seedling. It was first
 placed under cultivation some twelve years ago.
 From what I saw and heard of its behavior, I was induced to purchase the en-
 tire stock in the fall of 1888. In all this time it has never winter killed in the
 least at 20 degrees below zero, and has regularly borne large crops of fine
 fruit. It has met with marked success at the Experiment Stations, and we
 predict as great popularity for it when it becomes better known, as the
 "Greenville" Strawberry has; and feel confident that a trial with it will more
 than please our customers.

Its merits are **Good Size, Extra Fine Quality, Extreme Hardiness, and
 Great Productiveness;** a rare combination not found before so far in
 any other Blackberry. It is described as follows by Prof. H. E. VanDeman:

"Fruit medium to large, oblong conical, irregular, with very large drupes
 and small seeds and core; quality excellent."

What Others Say of the "ELDORADO."

W. J. Green says: Blackberries were much injured by the cold winter—
 none but the hardiest escaping. A new variety, not introduced, called the
 "Eldorado" passed through the Winter quite as well as Snyder and Ancient
 Briton.

Samuel B. Green, Horticulturist, Minnesota Experiment Station, August 9, 1892, says—Plants sent us in 1891 are bearing some fruit this season. Fruit is of good size and plants healthy, came through the winter in good shape.

From last year's experience I can say that the "Eldorado" is an immense producer, the berries ripen evenly and is very sweet, medium in size, second early. The yield was much greater than that of any other variety on our grounds last year.—GEO. C. BUTZ, Horticulturist State College, Pa., Aug , ,

Blackberries arrived in due time. They were of good size and of very fine flavor.—W. W. FARNSWORTH, Secretary Ohio State Horticultural Society, August 6, 1892.

E. M. Buechly, Greenville, O., Dear Sir.—Your card of the 23rd and box containing specimens of the "Eldorado" blackberry came all right. This is just what we want, and I am delighted with the berry. The berries have no core, and are as sweet and delicious as any blackberry I have ever tasted grown under the most favorable circumstances.—H. E. VANDEMAN, Pomologist Washington, D. C., July 25, 1892.

And many other flattering testimonials omitted for want of space.

PRICE: ~~40~~ cents each, \$3.00 per dozen, ~~\$20.00~~ per hundred.

: : Cheap Collections. : :

For the benefit of those who are at distant points and wish to have stock mailed them, we shall take special care in filling such orders, and offer the following cheap collections, stock all to be in first-class condition, and trees of one year cut back to a few buds, etc. Order by number only. Either of the following for one dollar:

SET NO. 1—2 Downing's Winter Maiden Blush Apples and 4 other apples—our selection.

" 2—2 Downing's Winter Maiden Blush Apples, 2 Niagara and 2 Woodruff Red Grapes.

" 3—10 Grapes—2 each Delaware, Concord, Worden, Moore's Early and Niagara.

" 4—8 Grapes—our selection, one of each.

" 5—40 Raspberries—8 each of 5 best sorts.

" 6—3 Kansas, 3 Older, 5 Shaffer, 5 Gregg, 5 Cuthbert, 5 Marlborough.

" 7—6 Kansas, 6 Older, 20 of two other sorts—your selection.

" 8—15 Currants—5 Fay, 5 Victoria, 5 White Grape.

" 9—50 Strawberry Plants—10 each of Greenville, Lovett, Bubach, Beder Wood, Parker Earl.

" 10—40 Strawberry Plants—10 each of Greenville, Haverland, Windsor Chief, Cumberland.

" 11—22 Strawberry Plants—7 Greenville, 10 Lovett, 5 Timbrell.

" 12—50 Strawberry Plants—10 each of Greenville, Warfield, Lovett, Bubach, Beder Wood.

" 13—13 Strawberry Plants—10 Greenville, 3 Timbrell.

" 14—10 Greenville, 1 Industry Gooseberry, 3 Downing.

" 15—8 Greenville Strawberries, 2 Trees—Downing's Winter Maiden Blush.

Any of the following collections by mail for only \$2.00, delivered at your post-office:

SET NO. 16—25 Strawberry Plants—20 Greenville, 6 Timbrell.

" 17—56 Strawberry Plants—10 Greenville, 6 Timbrell, and ten each of 4 other kinds—our selection.

" 18—25 Greenville Strawberry, 1 Niagara, 1 Woodruff Red, 1 Delaware, 1 Moore's Early, 1 Concord.

" 19—~~25~~ A SPECIAL BARGAIN—25 Greenville Strawberry, 3 Trees—Downing's Winter Maiden Blush Apple.

" 20—10 Greenville Strawberry, 5 Trees—Downing's Winter Maiden Blush Apple.

" 21—3 Eldorado Blackberries and 50 Greenville Strawberries.

The following \$2.00 collections are to be sent by freight or express, as they may be ordered, the purchaser paying charges. These will be fine trees and of good size:

SET NO. 22—12 Apple Trees—2 Downing's Winter Maiden Blush, and 2 each of 5 best assorted varieties.

" 23—10 Apple Trees—3 Downing's Winter Maiden Blush, 7 our selection from list.

" 24—16 Apple Trees—our selection.

" 25—3 Pears of our selection.

" 26—3 Lombard Plums, 3 Downing's Winter Maiden Blush, 1 Niagara Grape.

Besides the specialties herein offered, I grow a full line of general nursery stock of leading varieties suited to our latitude. Send a list of your wants and I will price them. Address all orders to
